### **The Pending Claims**

Brief discussions of the patentability of each of the independent claims follow.

Claim 231 has been amended to clarify that the label applicator can apply a label having a central opening and a different label having a narrower central opening.

Claim 248 includes post means for centering a first label having a narrow central opening and centering means for centering a second label having a wide central opening wider than the narrow central opening.

Claim 250 was allowed.

Claim 259 was allowed.

Claim 263 includes an inner centering post having a first effective diameter adapted to center a first label having a narrow central opening, and an outer centering ring adapted to center a second label having a wide central opening.

Claim 271 includes an outer centering ring, a centering post and a spindle, which are shown, for example, by reference numerals 460, 462 and 406, respectively. The '113 Hummell patent shows a first arm 38 in hole 46 and a second arm 36 in hole 44. It does not disclose an outer centering ring movable in an opening.

Claim 279 was allowed.

Claim 280 claims among other things a pair of flex rims each including an alignment wall having two sides angled relatively to each other along a crease line. This is shown, for example, in FIG. 81. This is not disclosed in the '654 patent to Koch.

Claim 281 was allowed.

Claim 282 was allowed.

Claim 283, in response to the Examiner's inquiry, includes a locator assembly shown for example in FIG. 31 or at 320 in FIG. 11, and a lift post shown, for example, by reference numerals 404 or 340.

Claim 302 includes an outer centering ring, a centering post and a spindle.
